

USER MANUAL COOL FIRE II

WARNING:

This is a vaping device only. Do to the shape of this device there may be some confusion about its function.

Please ensure that if using this device in public it is always used intelligently, and for your own safety never use this product in a way which may be misunderstood or misconstrued.

Please read these instructions carefully before using your new Cool Fire II .

1. The Cool Fire II is only to be used by people of legal age (18+). This device is NOT to be used by non-smokers, children, pregnant or breastfeeding women, people with or at risk of heart disease, or people taking medication for depression or asthma. The Cool Fire II is neither intended for, nor marketed as, a quit smoking aid or smoking cessation device.

2. This unit may include small parts, please keep out of reach of children and pets.
3. Do not mishandle your Cool Fire II , though it's made of metal it may be damaged if dropped.
4. Don't attempt to repair the unit by yourself as damage or personal injury may occur.
5. We recommend you use only high drain 18350 batteries (without protection, maximum current output is more than 5000mA.) Any other types of batteries may damage your Cool Fire II .
6. In order to guarantee the normal functioning of your Cool Fire II and to receive the best vaping experience we suggest that you charge your batteries when they are below 10% power.
7. In order to prolong the operating life of your Cool Fire II , please do not place it in excessively hot or cold environments.
8. Please obey local laws or regulations while vaping. If there are any bans or potential dangers, please keep your Cool Fire II off.
9. Your Cool Fire II is not waterproof, please keep it dry at all times.
10. Keep your Cool Fire II from sources of excessive heat.
11. Please don't drop, throw or abuse your Cool Fire II , you may cause damage to the outer shell or Inner components.

12. Please do not insert a battery backwards; the device will not operate and no vapor will be produced.
13. Innokin is not responsible for battery explosions due to the use of a low quality battery; The Cool Fire II kit does not include any batteries or chargers.

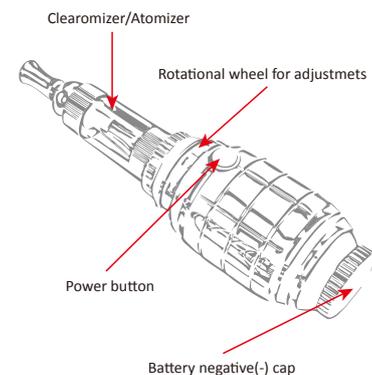

Warranty

Please consult with official Innokin distributors for their warranty and return policy. Innokin's warranty does not apply to products purchased through third party vendors.

BASIC PARAMETERS

The standby current: 150uA maximum
Maximum output voltage: 6.0V (unloaded)
Maximum output current: 5.0A
(Built in 7A fuse for protection and stability.)
Maximum output wattage: 12.5W (Watts mode)
Resistance of clearomizer: 1.0 ohm (minimum)
Battery: High drain 18350 (without protection, maximum current output is more than 5000mA.)

FEATURES

Scale Display Wattage

Scale display wattage improves intuitive control and provides more accurate performance.

Variable Wattage:

The rotational wheel adjusts wattage to the following: 7.0, 8.0, 8.5, 9.0, 9.5, 10.5, 11.0, 12.0, 12.5 .

The red LED will blink six times and turn off if the rotational wheel is not in place.

To set your desired wattage turn the rotational wheel to the left or right until you hear a click. When you adjust the wattage with the rotational wheel please check the wheel is set to your desired wattage.

Battery Level Indicator:

The battery capacity is displayed via green, yellow, and red LED lights.
Green = Fully Charged
Yellow = Half Discharged
Red = Charge Needed

Reverse Battery Protection Circuit.

Built in 7A fuse for protection and stability.

Short Circuit Protection.(0.6 +/-0.2 ohm)

ON/OFF battery switch.

LED Battery Power Display.

Low Voltage Warning.

Overtime Vaping Warning (10 seconds switch cutoff).

Battery safety protection (Vent holes).

High compatibility 510 connector: Will fit iClear16, iClear30 and iClear30S etc dual coil clearomizers, as well as standard 510 accessories.

OPERATION GUIDE

When a battery is installed, the LED light will blink from red to yellow to green the Cool Fire II will be in off mode.

"⏻" button: ON/OFF battery switch.

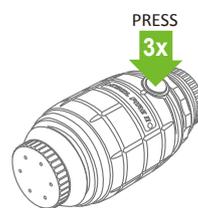

To enable or disable the batter unit quickly push the "⏻" power button three times. Once powered on, hold the button down to activate the unit and commence vaping.

ON Mode

Quickly click the "⏻" button three times to power on your Cool Fire II ; the LED light will blink from red to yellow to green. Once powered on, holding down the "⏻" button will fire the device.

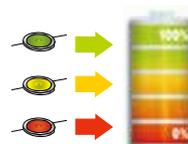

OFF Mode

Quickly click the "⏻" button three times to power off your Cool Fire II

Battery Capacity Display

The LED lights will display green, yellow or red to indicate full battery charge, half capacity or if charging is needed.

LED Light Blinking Mode

The LED light will blink different colors to indicate current battery voltage.

1. Red LED light = Battery voltage is lower than 3.6V
2. Yellow LED light = Battery voltage is between 3.6V - 3.75V
3. Green LED light = Battery voltage is higher than 3.75V
4. The Red LED will keep blinking for 8 seconds when battery capacity is lower than 3.3V. When power is low there will be no output and after 3 consecutive low power warnings the device will power OFF.
5. If a load short circuit is detected the Red LED light will stay lit for 5 seconds and no vapor will be produced when the "⏻" button is pressed.
6. 10 seconds cutoff: If the "⏻" button is held down for 10 seconds or longer the LED will blink 10 times then turn off. The Cool Fire II will automatically shut off until the "⏻" button is released and pressed again.

NOTES

Replace the atomizer if vapor volume decreases, or refill when liquid levels are low.

The manufacturer is not responsible for a damaged atomizer, cartomizer or clearomizer. Never use your Cool Fire II without an atomizer, cartomizer or clearomizer.

Please consult your atomizer documentation for proper usage instructions.

Use the Cool Fire II only as intended.
